Please reject NAB's petition 04-160. XM (satellite) radio provides me with useful/timely/accurate local information regarding traffic and weather issues. Being in the military means relocating every 2-3 years and being TDY on a constant basis. XM radio gives me one location to go for local weather and traffic no matter what state or Air Force base I'm at. I don't have to spend time hunting for a local station and hope that I catch the traffic report or weather report that they give once an hour. I strongly urge you to reject this petition. Thank you for your consideration.
